PROFESSIONAL SUMMARY

BCA student (3rd year) with programming experience in **Python and C++**, and hands-on project experience building web-based dashboards and workflow applications using **HTML and CSS**. Familiar with database management and basic **Git and GitHub**. Develops problem-solving skills through hackathons and project-based assignments, with an interest in software development, web development, and software engineering internship opportunities.

TECHNICAL SKILLS

Programming Languages: Python, C++

Web Technologies: HTML, CSS

Databases: SQL, Database Management

Version Control: Git, GitHub (Basic)

Development Focus: Web Applications, Interactive Dashboards, Workflow Applications

PROJECTS

Stock Screener Dashboard

Tech Stack: HTML, CSS

- Developed an interactive stock market dashboard to present and analyze key stock-related information in a structured interface.
- Created visual charts, tables, and filtering features to make stock data easier to understand, compare, and review.
- Organized financial information into a clear, user-friendly dashboard designed for quick analysis and navigation.

Multilevel Loan Application

Tech Stack: HTML, CSS

- Developed a multilevel loan application system for managing applications through different stages of processing and approval.
- Implemented a structured workflow for submitting, reviewing, and processing loan requests at each level.
- Designed a simple, organized interface to improve the clarity and usability of loan application management.

EDUCATION

Bachelor of Computer Applications (BCA)

MIET Kumaon, Kumaon University, Haldwani, Uttarakhand

Academic Status: Currently in 3rd Year

Class XII — HGSSVM | **Percentage:** 75%

Class X — HGSSVM | **Percentage:** 73%

ACHIEVEMENTS

- Participated in hackathons and team-based problem-solving activities.
- Completed 2 project-based assignments during internship training.

CAREER INTEREST

Target Roles: Software Developer | Web Developer | Software Engineering Intern
